SUMMARY

Frontend Developer skilled in HTML5, CSS3, JavaScript (ES6+), and React.js, with hands-on experience building responsive, component-based web applications and integrating REST APIs. Completed a Full Stack Web Development Bootcamp, delivering projects spanning e-commerce, games, and data-driven business tools. Strong foundation in Git/GitHub, reusable component design, and website performance optimization, with a growing focus on Generative AI. Eager to contribute to real-world frontend products while continuing to build production-grade engineering skills.

TECHNICAL SKILLS

Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS

Frontend Concepts: Responsive Web Design, DOM Manipulation, Reusable Components, Component-Based Architecture, Cross-Browser Compatibility, State Management (Context API)

Tools & Practices: REST APIs, Git & GitHub, Chrome DevTools, VS Code, Debugging, Jest (Basic Testing), Website Performance Optimization

AI & Other: Generative AI, Prompt Engineering, Digital Marketing, Canva

PROJECTS

E-Commerce Website | *Frontend Developer* | React.js, JavaScript, REST API, Tailwind CSS

- Developed a responsive e-commerce interface using React.js with reusable, component-based architecture and Tailwind CSS for styling.
- Integrated REST APIs to power product data and built functional product search and filtering.
- Implemented cart and wishlist functionality using React Context API for state management, along with a checkout UI, ensuring cross-browser compatible, mobile-responsive design.

Data Scraper & Lead Collection System | *Full Stack Developer* | JavaScript, Node.js, Express.js, Selenium

- Built a full-stack web-based system using Node.js, Express.js, and Selenium to automate data extraction from target sources.
- Implemented filtering logic and structured data management to organize extracted data for practical lead-collection use cases.
- Designed and debugged the scraping pipeline end-to-end, applying JavaScript for both automation logic and backend request handling.

2D Browser Game | *Frontend Developer* | HTML5, CSS3, JavaScript, Phaser.js

- Developed an interactive 2D browser game using HTML5, CSS3, JavaScript, and Phaser.js, implementing player movement and controls.
- Built collision detection and coin-collection mechanics to drive real-time scoring and game state management.
- Implemented core JavaScript game logic to manage user interaction and gameplay flow directly in the browser.

Additional project work: AI Chatbot, CRM system, and business websites.

EDUCATION

Master of Business Administration (Specialization: Information Technology) — Naraina College of Engineering and Technology
2024 – 2026

Bachelor of Business Administration — Naraina College of Management
2021 – 2024

CERTIFICATIONS

- Frontend Development Certificate — Coding Ninjas
- Generative AI & Digital Marketing — IBM
- Build with AI Workshop
